Teamwork Situational Judgment Test (SJT-TW)

Scoring Key Authorization

The scoring key for the Teamwork Situational Judgment Test (SJT-TW) will be provided by GESIS if the purpose of the test applications is consistent with GESIS’ statutes (see here; only in German). The primary objective of GESIS is the support of research in the social sciences. Please send the complete Data Use Agreement to zis@gesis.org to request the scoring key.

GESIS will not provide the SJT-TW scoring key for commercial purposes (including for-profit research institutes) or scientific theses. Further, the scoring key is not available for teaching purposes.

The above-mentioned purposes especially include:

- Test application by students or lecturers for educational purposes (e.g., demonstrations of psychological assessment)
- Scientific theses (e.g., bachelor or master thesis)
- Non-commercial, non-scientific purposes (psychological assessment in public agencies; e.g., employment offices)
- Scientific for-profit purposes (e.g., university spin-offs, clinical research organisations; exception: the project is publicly funded).

If your project has one of the above-mentioned purposes, GESIS will not provide the scoring key for the SJT-TW. However, the original test authors (Thomas Gatzka and Judith Volmer) may be contacted. Please provide information about your project and why the SJT-TW may be of interested for your project. The conditions under which the scoring key may be shared will be determined on a case to case basis (e.g., data sharing).
