Self-declaration:

I hereby confirm that the documentation of the measurement instrument (test) submitted regarding the measurement instrument

(1) is the procedural instructions that are also available to users and
(2) that all information that must necessarily be available according to the “Standard for information and documentation of instruments for measuring human experience and behavior of the Diagnostic and Testing Board of the Federation of German Psychologists Associations” (Schmidt & Kersting, 2020) is available.

I am informed that the certificate entitles me to advertise for the procedure with the following statement:

“The documentation of the test ICT Self-Concept Scale (ICT-SC25) complies with the quality requirements of the Diagnostik- und Testkuratorium (DTK) in terms of information and documentation that is required for instruments assessing human experience and behavior. According to the DTK, the test ICT Self-Concept Scale (ICT-SC25) therefore meets the prerequisites to be submitted to quality inspection. An actual quality inspection of the test ICT Self-Concept Scale (ICT-SC25) has not been performed by the DTK.”

I hereby authorize the DTK to publish this self-declaration as well as the “DIN SCREEN Checklist 1, Version 3” filled out by me for the above-mentioned procedure.
